

BS Y Strainer

STRAINER

Diameter: DN50-300

Pressure: PN1.0 / 1.6mpa

Temperature: -29°C-200 °C

Medium: Water, Oil,

Body material: cast iron, ductile iron

Connection: Flange

Product Introduction:

The Y type strainer is a small device to remove liquid contains solids, Insure the normal work and operation of compressors, pumps and other equipment and instruments, also with the functions of process stable, guarantee security.

Besides, it has a very high of meaning to improve product quality.

Y type strainer is used in the filed of steam, air, kerosene, water, weak corrosive gas or liquid.

Features: Flow fast, leading to a small pressure loss, stain resistance, easy slag.
